

take any image that runs to final size
out to the red line (bleed)

The diagram shows three nested rectangular boxes. The outermost box is a red line, representing the bleed area. The middle box is a black line, representing the finished size of 50x90mm. The innermost box is a green line, representing the type area. The text in this block is red and is positioned within the bleed area, outside the finished size box.

Keep any text within the green box (type free)

The text in this block is green and is positioned within the green box, which is inside the black finished size box.

the black line represents finished size (50x90mm)

The text in this block is black and is positioned within the black box, which is inside the green type area box.
